CHINA MOBILIZES A MILLION MEN FOR WAR ON WORLD

WOODING RAIN FROM CLOUDS WITH BOMBS

The Evening World's Scientific Experiment to
Relieve Suffering in the Heat-Stricken City
—Huge Bombs Fired at the Skies from
the Dome of the Pulitzer Building—
The Experiment Conducted by
Prof. C. R. Bishop.

Prof. G. R. Bishop, of Tucson, Ariz., this afternoon, on behalf of The Evening World, endeavored to relieve New York from the oppressive heat which has hung over the city for the past week.

Prof. Bishop is one of the best known rainmakers in the West, and has operated successfully in Arizona, Colorado, New Mexico, Kansas, Nebraska and other States where droughts are frequent. He reached New York Tuesday morning, and to-day was sought by The Evening World and asked if it would be possible to bring about a rain to cool the atmosphere. Prof. Bishop said he would do his best, and immediately set about making his preparations.

A scientific experiment in the interests of the heat sufferers of the city was attempted this afternoon from the dome of the Pulitzer Building.

Prof. G. R. Bishop, of Tucson, Arizona, one of the most noted rainmakers of the United States, at the instance of The Evening World, exploded two dozen rain bombs in an endeavor to bring about a downpour which would cool off the parched earth and bring relief to the unfortunates whose strength has been slowly sapped away by the heat and awful humidity which have continued in New York for the past week.

Prof. Bishop arrived unexpectedly in New York yesterday, and his services were immediately engaged in the hope that his successes of the West might be repeated here.

The most elaborate preparations were made by him, and at 3:21 the first bomb was exploded, nearly a

thousand feet above the great gilt dome of the Pulitzer Building.

Then the professor, assisted by several men experienced in such matters, exploded five more bombs at intervals of forty-five seconds. The effect of these explosions was at once noticeable in the skies.

When the first bomb soared upward there was not a cloud to be seen in the heavens.

By the time the last of the six had been fired there was a distinct change in the appearance of the sky. White, fleecy clouds began gathering, and at the end of ten minutes there appeared in the zenith a dark, irregular cloud, larger than the others, which hovered above the city to the satisfaction of Prof. Bishop.

"I can't say that it means rain immediately," said the Professor, studying the horizon and zenith carefully, "but those six bombs have certainly caused an atmospheric disturbance which is likely to bring about the de-

sired result. I hope so," he added feelingly, "for the sake of the suffering infants and the aged in this great city."

With the explosion of the six bombs the Professor decided to make longer intervals between fires, and for the next hour discharged them once every five minutes.

The noise of the explosions of these dynamite bombs—they are the largest made by the Pain Fireworks Company—could be heard for miles around, and created intense interest and even excitement.

From the dome of the Pulitzer Building the view of the immediate neighborhood was interesting.

City Hall Park was thronged with persons, all looking skyward. The roofs of all the office buildings and the windows were filled with curious persons, while the Brooklyn Bridge was lined with thousands, all eyes focused on the scene of the experiments.

GEN. CHAFFEE TO COMMAND IN CHINA.

WASHINGTON, July 18.—It has been decided to appoint Gen. Chaffee, who will command the American forces in China to the rank of Major-General. The matter has been under consideration all day.

DEATH OF WOMAN PASSENGER.

YELLOW-FEVER VICTIM?

Autopsy Indicates that Quarantined Patient Died of Dread Disease.

A Syrian woman, a second-class passenger on the steamer Havana, who was detained on Hoffman Island, died suddenly early this morning and the body was removed to Swinburne Island for an autopsy.

The autopsy shows suspicious indications that the woman died of yellow fever.

Dr. Doty says the woman came from the steamer apparently well and complained of no illness while at Hoffman Island until late last night.

It was impossible to learn from her any history of the illness on the way from Havana, because the woman was unable to speak English. Her fellow-passengers could not remember anything concerning her, as she was unable to communicate her wants and kept aloof.

BROCKWAY'S RESIGNATION.

ELMIRA, July 18.—Supt. Brockway's resignation was said to have been in the hands of the Reformatory Board of Managers at to-day's executive session. President Sturges denied that action had been taken toward Brockway's removal. He would not discuss the reported tender of a resignation.

PRINCE TUAN MASSES VAST ARMY FOR THE CONFLICT.

China has at last shown her hand and is making war on the whole world.

Prince Tuan has mobilized an army of 950,000 men and has planned a great campaign against the allies.

Four army corps will operate against various bases of supply held by the great powers in China.

The Chinese fleet has been prepared to give battle to the foreign squadrons in China seas.

All the Empire is aflame and Corea is also disturbed, while the Viceroy of the huge province of Honan says he cannot control the rebellion.

Shanghai is threatened and the Chinese forts are making ready. Seventeen foreign warships have assembled to protect the settlements.

Russia is reported to be sending a great army through Manchuria to Peking.

Earl Li Hung Chang's memorial to the Empress says envoys must be rescued, Germany must get an apology and compensation made for losses.

Our losses at Tientsin July 13 were 18 killed and 79 wounded. The casualties for July 14 are not yet reported.

A despatch from Consul Fowler at Chefoo says the Legations were safe July 9. A last message from the Japanese envoy June 29 said massacre was imminent.

Fifteen thousand Japanese troops are landing at Taku. British warships are threatening Shan-Hai-Kwan at the end of the great wall.

ARMY OF 950,000 MEN TO FIGHT THE WORLD.

ST. PETERSBURG, July 18.—A despatch from Chefoo says that Prince Tuan has mobilized 950,000 men, divided into different corps, for a great campaign.

The Chinese fleet is concentrating in the China Sea and hostilities are expected.

The Northern Corps has been ordered to expel foreigners from Amur. The Peking Army is divided into four corps, the first of which is to operate against Mukden and occupy the roads between Peking and Shan-Hai-Kwan. The second is to concentrate at Tientsin and the third at Peking, whence a column numbering 40,000 will be sent to Wei-Hai-Wei and Tsin-Tsu, while the fourth corps will concentrate at Nanking.

A despatch from Nanking announces that Prince Tuan has ordered a great military movement, owing to the appearance of the Japanese in China. The Viceroy in Nanking has informed the foreign consuls there that he cannot be answerable for events in Chao-Shi, Ning-Po and Chu-Chau. The foreigners are fleeing to Shang. The position is alarming.

Sixteen foreigners have arrived at Nanking from Ning-Po, where the houses of foreigners have been burned and missionaries horribly maltreated. The rebellion has taken hold of Southern China.

Foreigners at Chu-Chau and In-Chau have been attacked and are fleeing panic-stricken.
